**September 17-21, 2007**

This week, while reading, we will be continuing our study of main ideas and supporting details. We will, also, be starting a new study of making conclusions and inferences from reading.

We will be working on dialogue in writing.

We will be studying the problem solving strategy "Guess and check" in our problem of the week activity.

**\*\*This week students will be taking the ISTEP test. 7<sup>th</sup> grade students will also be taking the ISTEP: Science test next Monday (9/24).**

**\*\*Agendas need to be signed by a parent/guardian each night. These are checked for signatures and notes daily during Resource class.**
